

Julien Pontoire

Data Science & Artificial Intelligence Engineer

UTC 2026 Engineer · Final-year internship at Airbus Defence and Space · AI Agents in industrial context

Available from September 2026

📍 France | ✉️ pontoirejulien@gmail.com | 📞 +33 7 82 75 34 71 | 🌐 github.com/jpontoire | 🌐 Julien Pontoire

Experience

AI Engineering Internship — Airbus Defence and Space

February 2026 – July 2026

Workflow automation · LLM Agents · Software engineering

France

- **Open-source AI tools:** deployment in an industrial environment (OpenCode, OpenClaw)
- **Prompting language:** development to automate software engineering tasks
- **Autonomous agent:** analyzes Jira issues and automatically proposes code fixes as GitLab Pull Requests for developer review

Assistant Engineer Internship — Sciences Po Medialab

September 2024 – February 2025

Data collection and processing

Paris, France

- Improved and developed data collection and processing tools for the laboratory
- **Rust:** implemented stemming algorithms (Porter, Carry) in a library
- Built data collection pipelines (Reddit, press websites) for scientific research
- Developed a bookmarklet to aggregate results from multiple search engines

Projects

VR Narrator with Generative AI

February – July 2025

- Research project: developed an AI-powered narrator in a mixed reality scene for the Memorial of Internment and Deportation in Compiègne

Student Path Prediction

February – July 2025

- Analyzed a higher education dataset to predict students' academic outcomes
- Applied supervised methods (logistic regression, random forests) after PCA and unsupervised exploration

Data Warehouse & Business Intelligence

February – June 2025

- Designed an ETL pipeline (Python)
- Built a data pipeline on Snowflake
- Created interactive dashboards with Power BI

Reddit Cartography with Gephi

September – December 2023

- Data collection via the Reddit API, Python filtering and processing, cluster analysis, network visualization with Gephi

Education

Université de Technologie de Compiègne (UTC)

2021 – 2026

Engineering degree in Computer Science — GPA: 4.63/5

Compiègne, France

- **Commitment:** Elected student representative on the Academic and University Life Council (2023 – 2025)

Université du Québec à Chicoutimi (UQAC)

August – December 2025

International exchange semester

Chicoutimi, Canada

- Business Intelligence, Video Game Development, Parallel Architecture, Metaheuristics

Baccalauréat Général

July 2021

Mention Très Bien — Specialization in Mathematics and Engineering Sciences

Lycée Boucher de Perthes, Abbeville

Technical Skills

AI & Data Science: Python, NumPy, Pandas, Scikit-learn, PySpark, Ollama, BeautifulSoup, LLM Agents

Software development: Rust, Java, C, JavaScript (VueJS, React, SpringBoot), R, LISP

Data & BI: PostgreSQL, Snowflake, phpMyAdmin, Power BI, ETL, Gephi

Tools: Git, Perforce, Linux, Visual Studio Code, JetBrains, RStudio, Unreal Engine 5, Unity

Languages

French: Native speaker **English:** C1 **Japanese:** A1
