 Julien Pontoire

Commitments

Elected student of the council of studies and university life (2023 - 2025)

Skills

 Git, Perforce, UML, phpMyAdmin

Languages

 Japanese - A1

ENGINEERING DEGREE – NOVEMBER 2026

EDUCATION

Business Intelligence, Video Game Development, Parallel Architecture, Metaheuristics

Engineering degree – GPA: 4.63/5

Mention Très Bien – Specialization in Mathematics and Engineering Sciences

EXPERIENCE

FEB 2026 – JUL 2026

- Deployed open-source AI coding tools in an industrial environment (OpenCode, OpenClaw)
- Developed a prompting language to automate software engineering tasks
- Designed an autonomous agent that analyzes Jira issues and automatically proposes code fixes as GitLab Pull Requests for developer review

SEP 2024 – FEB 2025

- Improved and developed data collection and processing tools for the laboratory
- Implemented stemming algorithms (Porter, Carry) in a Rust library
- Built data collection pipelines for Reddit and press websites for scientific research
- Developed a bookmarklet to retrieve search results from multiple search engines

PROJECTS

FEB 2025 – JUL 2025

- Research project: developed an AI-powered narrator in a mixed reality scene for the Memorial of Internment and Deportation in Compiègne

FEB 2025 – JUL 2025

- Analyzed a higher education dataset to predict students' academic outcomes
- Applied supervised methods (logistic regression, random forests) after PCA and unsupervised exploration

FEB 2025 – JUN 2025

- Designed an ETL pipeline (Python)
- Built a data pipeline on Snowflake
- Created interactive dashboards with Power BI
